

## Participate in a Research Study of Treatment for OEF/ OIF Veterans with PTSD and Alcohol Dependence

**War**

**Distressing memories**

**Alcohol**

**Beer**

Have you been in a  
**traumatic life threatening situation?**

- I can't sleep
- I can't take these disturbing memories
- I need alcohol to help me relax
- People say I drink too much

If you experience these symptoms,  
then you may have:

**Posttraumatic Stress Disorder**

and

**Alcohol Dependence**

- OEF/OIF Veterans ages 18-65
- Financial compensation is available

John Roache, Ph.D. of the UT Health Science Center and South Texas Veterans Health Care System is conducting a study using SSRI medication and psychotherapy to treat OEF/OIF veterans with Posttraumatic Stress Disorder (PTSD) and Alcohol Dependence. If you like to learn more about this treatment study, call the Be Well Center at 210-562-5400.

**Contact the Be Well Center at 210-562-5400. All information is Confidential.**

IRB Approved February 14, 2011
